```
Wypisz wszystkie liczby od 1 do 100 - odpowiedzi:
     - podzielna przez 3 -> Fizz / podzielna przez 5 -> Buzz
     - podzielna przez 3 i 5 -> FizzBuzz / nie podzielna -> ta sama liczbę
3
4
5
     1. Test shouldReturn1WhenNumberIs1
     2. Metoda check zwraca 1 (w klasie test)
 7
     3. Refactor - statyczny imoport equals
     4. Test shouldReturn2WhenNumberIs2
     5. Metoda check zwraca value of number
10
     6. Refactor - mozemy jeden z tych testow usunac
11
     7. Test shouldReturnFizzWhenNumberIs3
     8. Metoda check zwraca Fizz if number==3
12
13
     9. Refactor - Zmienna statyczna Fizz
14
     10. Metoda check zwraca Fizz if number%3
15
     11. Test shouldReturnBuzzWhenNumberIs5
     12. Metoda check zwraca Buzz if number%5
16
17
     13. Test shouldReturnFizzBuzzWhenNumberIs15
18
     14. Metoda check zwraca FizzBuzz if number%5 i number%3
19
     15. Refaxctor = StringBuilder na FizzBuzz
